23					48				
24					49				
25					50				

Remember:

- * Measure to the nearest **1/8 inch**, rounding down.
- * Measure the **width in 3 places**: top, middle, and bottom. Take the **smallest** of the three.
- * Measure the **height in 3 places**: left, middle, and right. Take the **longest** of the three.
- * Start measuring at the **left-most window** and proceed **clockwise** around the room. Assign each blind a number in ascending order (i.e., the third window from the left in the kitchen should be called "Kitchen 3"). This makes it **easy to match your blinds** to the proper windows when they arrive.
